

Town of Vail Summer 2016 Economic Indicators Summary

(Based on Summer data: May 1 - October 31, 2016)

INTRODUCTION: This summary is provided as a part of the Town of Vail 2016 Economic Development Strategic Plan and introduces a synopsis of Vail Economic Indicators representing summer 2016 (May - October) seasonal view and is supported by a more granular chart (attached). Summaries are published twice annually as soon as practical after the data has become available, is limited in scope by the availability of data from secondary sources and is believed to be generally accurate, but not independently verified.

Tourism

Vail's 2016 summer season experienced growth in most tourism indicators. During the summer of 2016, Vail experienced a significant increase in lodging occupancy (+13.8%) as well as in average daily rate (+11.3%) resulting in a dramatic increase in overall revenue per available room (RevPAR) (+26.6%). This increase in occupancy (to 49.4%) and average daily rate (to \$223) represent the highest levels since this measurement system was established. Comparatively, Vail outperformed other U.S. western mountain resorts (based on overall DestiMetrics industry data) who increased both aggregated occupancy (+6.6%) and rate (+7.6%) and achieved an increase in RevPAR (+14.7%) but to a lesser extent than Vail's. According to Vail's Daily Occupancy Report (produced by DestiMetrics), 18 weekends or two thirds of all weekends in the summer season were at an occupancy of 70% or higher (up from 13 last year). This encompassed every weekend from June 11 through October 1st with 8 of those weekends at between 85% and 95% occupancy. The most notable improvements in occupancy took place during August and early September and may be a precursor to larger increases in rate and smaller increases in occupancy in the future as capacity limits may hinder the ability to bring additional overnight visitors to Vail during peak times. The Vail Cascade Resort (285 rooms) was closed during the summer of 2016 for renovations, which is noteworthy and represented 7.5% of Vail's professionally managed short term rental inventory. As a result, while the supply of short term rooms/units decreased, occupancy at other lodging properties may have increased, absorbing otherwise misplaced guests. The statistical consequences of which is that Vail's increase in overall lodging tax collections may not mirror increases in occupancy, rate or RevPAR. Other metrics to note are gasoline prices, which declined (-15.7%) over the previous summer and have decreased dramatically over the past two summers (-37.3%). This may have contributed to the continued increase in Tunnel Traffic (+6.3%). Deplanements at Eagle County Regional Airport increased slightly (+2.4%) from last season as did deplanements at Denver International Airport (+5.9%). Cars in the parking structures and on the Frontage roads show an increase (+9.3%), while visitors to the Vail Village and Lionshead Welcome Centers (located at the parking structures) increased significantly (+26.1%). A variety of special events took place during the summer months and recent changes in attendance counting methodology (by a third party firm) attendance metrics are more reliable than in previous years, to wit: Overall event attendance increased (+13.3%) from last summer. Most had attendance consistent with last year, but several notable increases include GoPro Mountain Games (+22.0%), Hot Summer Nights (+16.4%), Vail International Dance Festival (+51.4%) and Vail Lacrosse Shoot-Out (+16.4%). There were no significant events added or removed from Vail's summer line up that affected overall attendance, however the summer of 2016 marked the inaugural season of Vail's Epic Discovery, an on-mountain summer adventure experience, located at the top of the EagleBahn gondola. The Town of Vail reported a dramatic increase in lift tax revenue (+45.6%) over last summer.

Real Estate

This season's real estate indicators show a slight decrease in number of transactions (-3.9%) and a considerable decrease in average sale price per transaction (-16.9%) with total gross sales decreasing (-22.3%). Average price per square foot decreased (-10.3%) as well. Vail's real estate market had been steadily improving from the summer of 2011 through the summer of 2015, prior to this softening in 2016. Based on winter 2016/17 trends to date, these summer metrics may not be indicative of a declining market, rather an anomaly with fewer luxury property sales and more moderate priced properties sales during the summer months.

Town Revenues

Sales Tax is segmented by business type (retail, lodging and food/beverage) and further broken down geographically by Vail neighborhoods. Excluding out of town collections, all segments combined showed an increase in overall summer sales tax revenue (+4.5%) following another record breaking summer season's sales tax revenue, which had increased (+7.9%) last year. Specifically, lodging (+6.5%) and retail (+6.3%) tax collections each saw a higher year over year increase than food and beverage sales (+1.1%). When segmented by neighborhood, Lionshead

experienced larger increases overall (+12.2%) compared to Vail Village (+11.4%). Cascade/Sandstone/East & West Vail showed a significant decline (-18.1%) due to the closure of the Vail Cascade Resort in the Cascade Village and the Holiday Inn (closed on Sept. 6). A study conducted by DestiMetrics shows that the average of taxable sales at comparable ski towns was also up season-over-season although with slightly larger increases in both lodging sales (+9.7%) and total taxable sales (+6.6%).

Other Tax Collections by the Town of Vail include construction use tax, property tax and real estate transfer tax and are reported on a calendar-year basis. As a result, these taxes do not correlate with the seasonal indicators above.

Business Growth

Business Growth is based on broader county and national indicators, many of which are tracked on an annual basis and lag significantly. While not as current and telling of the current market conditions, the Business Growth indicators show a strengthening economy as evidenced by the total 2016 amount of banking deposits (USD) increased from 2014 (+11.5%).

Macro Economics

The broader economic conditions have a significant impact on determining consumers' discretionary spending and leisure habits, which in turn can significantly impact Vail's economic performance. While there are global economic challenges, the US domestic economy is strong across most sectors, with recent dramatic increases in financial and consumer marketplaces. These markets were beginning to show some volatility in recent months, most notably in the weeks running up to November's Presidential election. None of the volatility appeared to impact travel during the summer months, which continued to grow significantly both across the industry and in Vail. A tolerance for rate increases, which was slipping in winter 2015/16, returned in summer 2016, though it must be noted that summer rates remain dramatically lower than winter. Among the positive economic variables is the continuing low cost of gas and other transportation fuels. Among the negative is the continued strength of the US dollar against foreign currencies, particularly the Canadian and European markets, resulting in a decrease in foreign visitation to ski/mountain destinations. (1) Consumer Confidence has moved out of the 90-point range to eclipse the 100-point mark for each of the past four months, its longest stretch above 100 points since July 2007. Consumers are feeling more confident in both current conditions and long-term economic outlook, bolstered by wage increases in 2016 that were lacking in the prior six years of recovery and significant and ongoing gains in financial markets that are being reflected in savings and retirement accounts. (2) Job Creation & Unemployment continues to be an extremely consistent part of the economic/consumer engine. Though job creation has slowed somewhat over the past three months, employers added an average of 205,000 jobs during the past six months, down only 5,000 jobs per month from the prior six months, and continuing a record 74-month streak of job creation during which an average of 199,405 jobs have been added per month. The national unemployment rate was at or below 5.0 percent for the past fourteen months, and has been below 5.0 percent for five of the last six months, now firmly below pre-recession levels. (3) Wall Street and other domestic financial markets have shown such resilience as to be only occasionally impacted by global events over the course of the past six months, quickly recovering when outside events do get reflected in market performance. Anticipated volatility heading into the Presidential election didn't materialize and concerns coming out have been set aside in favor of high market confidence in certain sectors sufficient to drive dramatic increases in the past six weeks aka "Trump Bump". Overall, the Dow Jones has added 7.8 percent in the past six months, and the tech-heavy Nasdaq 13.8 percent while the more consumer-reflective Standard & Poors 500 has added 9.1 percent. (4) Foreign Exchange Rates continued to be very high for inbound visitors to the US as the US dollar remained the strongest major currency in the global marketplace. On the flip side creating great deals for international travel from the US, but at some consequence to domestic travel in so doing.

This Summary and the foundational data set will be further updated and expanded upon twice annually, taking its place among the tools available to better inform the Town staff, its various committees and the public it serves.
